Nitgen Access Manager Serial Number

TCP/IP Setting

1. After selecting network mode, TCP/IP must be configured to connect to the server. Select "Network" -> "TCP/IP", and enter the network information.

2. Enter a unique terminal ID between 1 and 2000. The same terminal ID cannot be used in the same server.

3. Press "on" in the "DHCP" menu to decide to use DHCP. When using DHCP, enter into the server IP the IP and port information of the server with AccessManager Professional installed.

> **TIP**
>
> What is DHCP (Dynamic Host Configuration Protocol)?
>
> The DHCP server automatically allocates and manages settings for TCP/IP communication. If DHCP is on, related information such as terminal IP, subnet mask, and gateway are automatically allocated.
